

2006 Cain's Quest

WYSE Design & Development Inc. was a proud sponsor of four teams during the 2006 Cain's Quest event. This 2200 km endurance race took place in the Labrador wilderness of Canada in March 2006. Not only were these teams carrying a WYSE System, they were also carrying a true sense of confidence.

One of the WYSE sponsored teams, **Team #17 - Strangemore and Dumaresque**, came in 3rd place during this race. *"It was a total comfort to know that we had a quick way out if we got in time-consuming trouble,"* says Strangemore and Dumaresque.

Strangemore and Dumaresque, shown here at the 2006 Cain's Quest event, came in 3rd place on the 2200 km endurance race through the Labrador wilderness.

Another one of the WYSE sponsored teams had this to say, *"...if I had not brought this winch with me... I could possibly still be there digging myself out"* (Trevor Flynn, City Auto Parts).
